

Step 1: Open the Object Manager tab.

The screenshot shows the Salesforce Setup interface. At the top, there's a navigation bar with links like 'Get Started', 'Check Out Top Features', 'Leave Feedback', 'Days left in trial 19', and a 'Subscribe Now' button. Below this is a search bar labeled 'Search Setup'. The main navigation menu on the left includes 'Setup', 'Home', and 'Object Manager' (which is selected). The 'Object Manager' section header shows '46 Items, Sorted by Label'. Below this is a table listing various standard objects.

LABEL	API NAME	TYPE	DESCRIPTION	LAST MODIFIED	DEPLOYED
Account	Account	Standard Object			
Account Contact Relationship	AccountContactRelation	Standard Object			
Activity	Activity	Standard Object			
Asset	Asset	Standard Object			
Asset Relationship	AssetRelationship	Standard Object			
Campaign	Campaign	Standard Object			
Campaign Influence	CampaignInfluence	Standard Object			
Campaign Member	CampaignMember	Standard Object			
Case	Case	Standard Object			
Contact	Contact	Standard Object			

Step 2: Fill the required fields and click Save button.

The screenshot shows the 'New Custom Object' form in the Salesforce Setup interface. The form is titled 'Custom Object Definition Edit' and includes a 'Save' button. The 'Custom Object Information' section contains several fields: 'Label' (with a red asterisk indicating it's required) is filled with 'Product_details', 'Plural Label' is filled with 'Product_detail', and 'Object Name' is filled with 'Product_details'. There is also a 'Description' field and a 'Context-Sensitive Help Setting' section with two radio buttons. The 'Content Name' field is set to '--None--'.

Custom Object Definition Edit [Save] [Save & New] [Cancel]

Custom Object Information * Required Information

The singular and plural labels are used in tabs, page layouts, and reports.

Label Example: Account

Plural Label Example: Accounts

Starts with vowel sound ☐

The Object Name is used when referencing the object via the API.

Object Name Example: Account

Description

Context-Sensitive Help Setting

☒ Open the standard Salesforce.com Help & Training window

☐ Open a window using a Visualforce page

New Custom Object

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name: Example: Account Name

Data Type:

Optional Features

- ☐ Allow Reports
- ☐ Allow Activities
- ☐ Track Field History
- ☐ Allow in Chatter Groups
- ☐ Enable Licensing

Object Classification

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. [Learn more.](#)

- ☒ Allow Sharing
- ☒ Allow Bulk API Access
- ☒ Allow Streaming API Access

Step 3: Now click on Fields and Relations and create the new one for the Activity_Details.

Allows users to enter a dollar or other currency amount and automatically format the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.

Allows users to enter a date or pick a date from a popup calendar.

Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.

Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.

Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.

Allows users to enter any number. Leading zeros are removed.

Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.

Allows users to enter any phone number. Automatically formats it as a phone number.

Allows users to select a value from a list you define.

Allows users to select multiple values from a list you define.

Allows users to enter any combination of letters and numbers.

Allows users to enter up to 255 characters on separate lines.

Allows users to enter up to 131,072 characters on separate lines.

Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.

phone	phone12__c	Phone		

Step 5: Now in the Home tab, Open the tab page.

Step 6: In Home search for the App Manager and select it. After that click on New Lightning App.

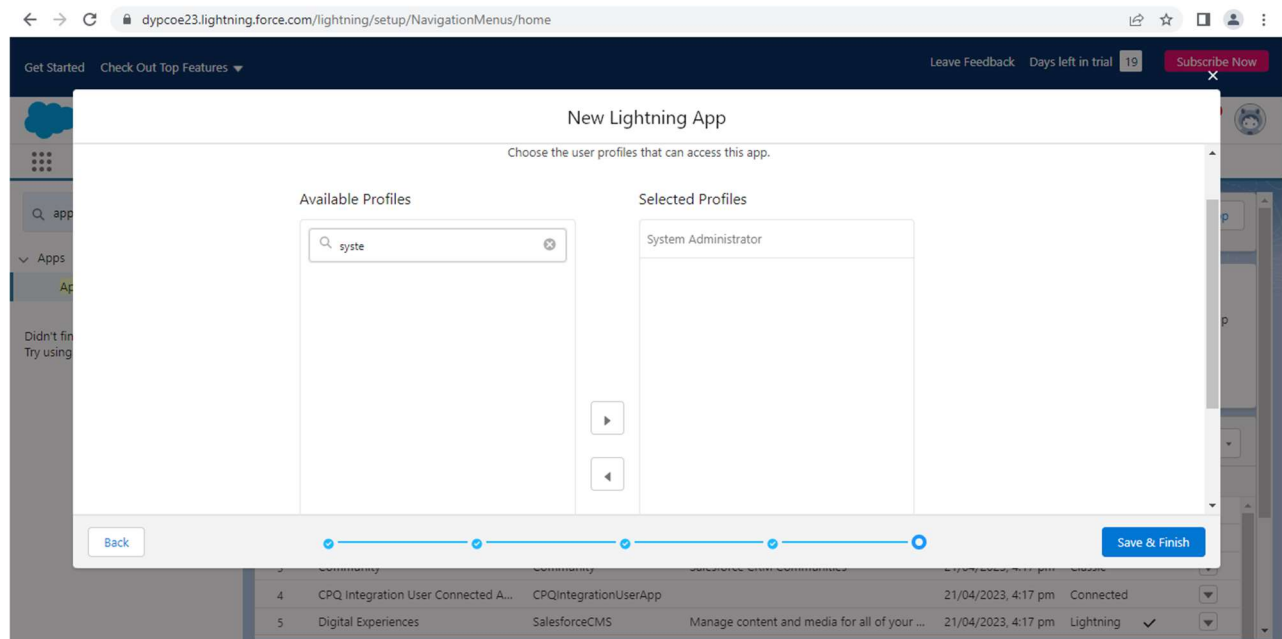

Step 7: Enter the details regarding the Activity and then click Next.

The screenshot shows the 'New Lightning App' setup wizard. The 'App Details' section on the left contains three text input fields: 'App Name' (with a red asterisk and help icon), 'Developer Name' (with a red asterisk and help icon), and 'Description' (with a help icon). All three fields contain the text 'Product Details'. The 'App Branding' section on the right includes an 'Image' upload area with an 'Upload' button, a 'Primary Color Hex Value' dropdown menu set to '#0070D2', and an 'Org Theme Options' checkbox labeled 'Use the app's image and color instead of the org's custom theme', which is currently unchecked. Below these sections is an 'App Launcher Preview' area. At the bottom right of the wizard is a blue 'Next' button. A progress bar at the bottom shows the current step is 1 of 5.

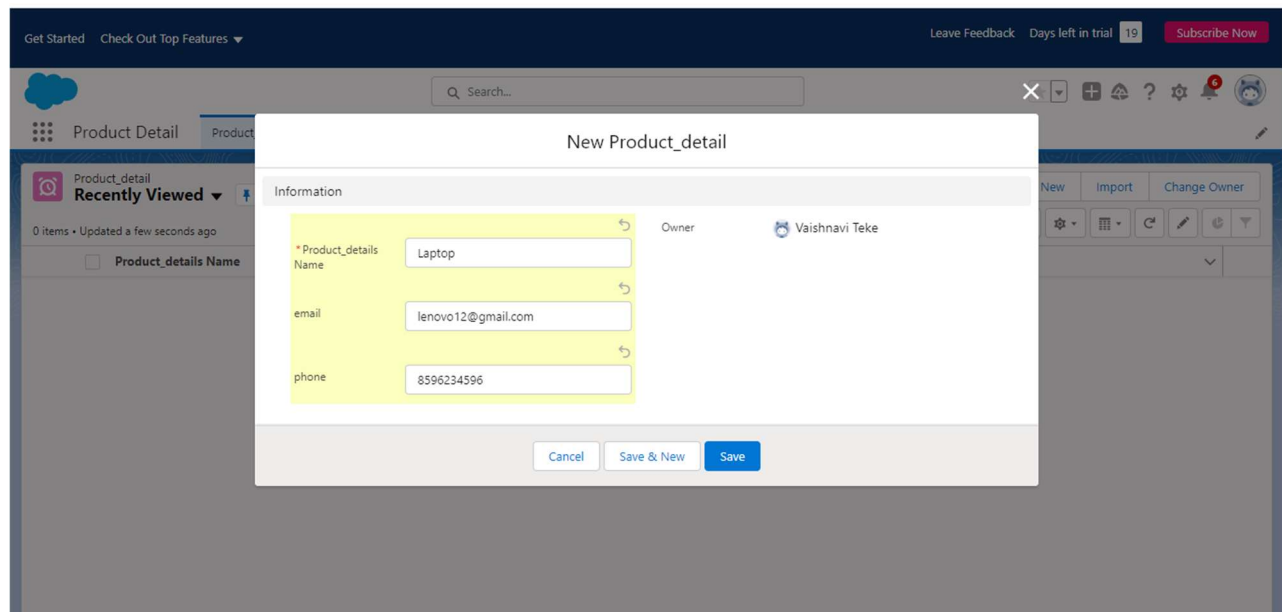

Step 8: Now in the Navigation Items tab search for the Activity_Details and move it to the Selected Items list. Then after click Next.

The screenshot shows the 'New Lightning App' setup wizard at the 'Navigation Items' step. A text box at the top explains: 'Choose the items to include in the app, and arrange the order in which they appear. Users can personalize the navigation to add or move items, but users can't remove or rename the items that you add. Some navigation items are available only for phone or only for desktop. These items are dropped from the navigation bar when the app is viewed in a format that the item doesn't support.' Below this, there are two panels: 'Available Items' and 'Selected Items'. The 'Available Items' panel has a search bar with 'pro' entered and a list of items: 'Process Exceptions', 'Products', and 'User Provisioning Requests'. The 'Selected Items' panel shows 'Product_detail' with a purple icon. Arrows between the panels allow moving items. At the bottom left is a 'Back' button and at the bottom right is a blue 'Next' button. A progress bar at the bottom shows the current step is 2 of 5.

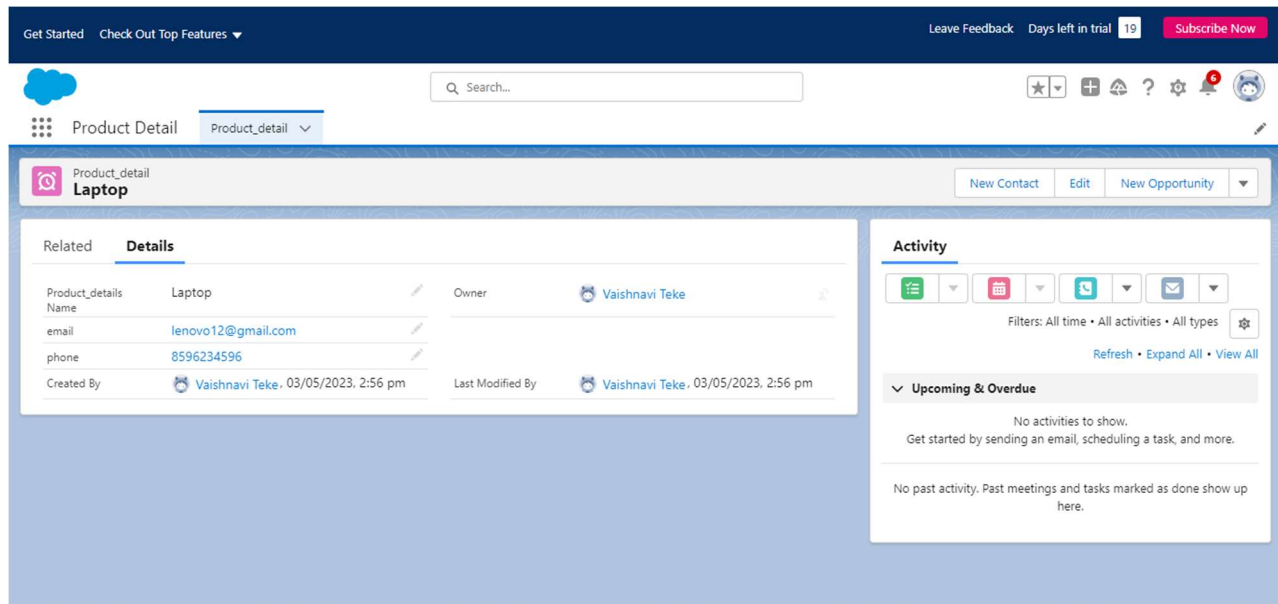

Step 9: On the User Profile tab, search for the System Administrator and move it to selected profiles. And then click Save & Finish.

Step 10 : Now click on the App Launcher and select the application which we have created.

Step 11: Now view thw activity which we have created and copy the URL which is shown in the search bar at top.

Step 12: Now open the new tab in the Chrome browser, go into Developer tools and paste the URL of application which we have copied.
